EXECUTIVE SUMMARY

AI & Data Science undergraduate specializing in machine learning and applied MLOps. Hands-on experience building, optimizing, and deploying ML models using Python, PyTorch, and scikit-learn. Worked on NLP and classification systems with measurable performance gains. Seeking ML / AI Engineer roles to build scalable, deployment-ready models in product teams.

PROJECTS

NEURAL NETWORK CLASSIFIER | PyTorch , scikit-learn | [\[Github\]](#)

- Achieved 93.7% multiclass accuracy using SGD with momentum and cyclical learning rate scheduling for stable and optimized training.
- Improved model convergence speed by 22% compared to fixed learning rate, reducing overall training time.
- Reduced inference latency by 35% through structured model pruning, while keeping overall accuracy loss under 1% on the test set.

RAG-BASED FINANCIAL INSIGHTS SYSTEM | Python, FAISS, Sentence Transformers | [\[Github\]](#)

- Built a Retrieval-Augmented Generation (RAG) pipeline to answer natural language queries over financial data using Sentence Transformers embeddings and FAISS vector search.
 - Processed and analyzed financial datasets with Pandas to generate relevant insights, improving response accuracy through top-k similarity retrieval.
-

WORK EXPERIENCE

Infinite Tech

Tamil Nadu

AI Developer Intern

Jun 2022 - Present

- Built LLM applications using LangChain, LangGraph, and RAG, improving response accuracy and knowledge retrieval.
- Developed AI models with PyTorch, handling data preprocessing, evaluation, and optimization.
- Used Git and Agile methodologies to design, test, and deploy scalable AI solutions and intelligent workflows.

Fortura Tech

Tamil Nadu

AI & Data Science Intern

Aug 2025 – Oct 2025

- Worked with Python, NumPy, and Pandas for data preprocessing and analysis tasks.
 - Prepared and cleaned datasets for machine learning pipelines using Pandas and NumPy.
 - Implemented basic machine learning workflows under senior engineer guidance.
-

SKILLS

Technical Skills

Programming & ML: Python, NumPy, Pandas, scikit-learn, PyTorch

Deep Learning: CNNs, Model Pruning, Transfer Learning

MLOps & Tools: Git/GitHub, Docker, Weights & Biases (basic)

Data & DB: SQL

EDUCATION

St. Xavier's Catholic College of Engineering, Nagercoil, TN

Bachelor of Technology , May 2026

Major in Artificial Intelligence & Data Science

Key Courses: Machine Learning • Deep Learning • Big Data Analytics • NLP • Computer Vision

Certification: ADPP | IBM AI Engineering | Python for Data Science(Infosys)
