Tamil nadu, TN | P: 9087518741 | doniarish1@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## EXECUTIVE SUMMARY

AI & Data Science undergraduate specializing in machine learning and applied MLOps. Hands-on experience building, optimizing, and deploying ML models using Python, PyTorch, and scikit-learn. Worked on NLP and classification systems with measurable performance gains. Seeking ML / MLOps internship or entry-level roles in product-focused teams.

## PROJECTS

### NEURAL NETWORK CLASSIFIER | PyTorch , scikit-learn | [\[Github\]](#)

- Achieved 93.7% multiclass accuracy by training a neural network using SGD with momentum and cyclical learning rate scheduling to stabilize and optimize learning.
- Improved training convergence by 22% compared to a fixed learning rate.
- Reduced inference latency by 35% through structured model pruning, removing low-weight connections while keeping accuracy loss under 1% on the test set.

### RAG-BASED FINANCIAL INSIGHTS SYSTEM | Python, FAISS, Sentence Transformers | [\[Github\]](#)

- Built a Retrieval-Augmented Generation (RAG) pipeline to answer natural language queries over financial data using Sentence Transformers embeddings and FAISS vector search.
- Processed and analyzed financial datasets with Pandas to generate relevant insights, improving response accuracy through top-k similarity retrieval.

## WORK EXPERIENCE

### AK Info Park

Full Stack Developer Intern

Tamil Nadu

Sep 2024 – Oct 2024

- Built 5+ React components with Node.js APIs, improving page load speed by 35% through code optimization and caching.
- Fixed 12+ critical bugs in production code, reducing system errors by 60% and improving API response consistency.
- Collaborated in a 6-member Agile team, using Git for version control and sprint-based delivery.

### Fortura Tech

AI & Data Science Intern

Tamil Nadu

Aug 2025 – Oct 2025

- Worked with Python, NumPy, and Pandas for data preprocessing and analysis tasks.
- Prepared and cleaned datasets for machine learning pipelines using Pandas and NumPy.
- Implemented basic machine learning workflows under senior engineer guidance.

## SKILLS

### Technical Skills

**Programming & ML:** Python, NumPy, Pandas, scikit-learn, PyTorch

**Deep Learning:** CNNs, Model Pruning, Transfer Learning

**MLOps & Tools:** Git/GitHub, Docker, Weights & Biases (basic)

**Data & DB:** SQL

## EDUCATION

### St. Xavier's Catholic College of Engineering, Nagercoil, TN

Bachelor of Technology (Expected May 2026)

Major in Artificial Intelligence & Data Science

**Key Courses:** Machine Learning • Deep Learning • Big Data Analytics • NLP • Computer Vision

**Certification:** ADPP | IBM AI Engineering | Python for Data Science(infosys)
