EXECUTIVE SUMMARY

2026 B.Tech graduate in Artificial Intelligence & Data Science with hands-on experience building AI and machine learning applications using Python, PyTorch, LangChain, LangGraph, RAG, and Text-to-SQL. Experienced in developing hybrid AI systems, NLP/classification models, vector retrieval pipelines, and tool-based workflows. Seeking AI Engineer, GenAI Engineer, or ML Engineer roles focused on building scalable AI applications.

PROJECTS

NEURAL NETWORK CLASSIFIER | PyTorch , scikit-learn | [Github]

- Achieved 93.7% multiclass accuracy using SGD with momentum and cyclical learning rate scheduling for stable and optimized training.
- Improved model convergence speed by 22% compared to fixed learning rate, reducing overall training time.
- Reduced inference latency by 35% through structured model pruning, while keeping overall accuracy loss under 1% on the test set.

BACKOFFICE AI CHATBOT | LangChain, LangGraph, RAG, Text-to-SQL, Pinecone, SQL Server, Redis | [Github]

- Implemented intent classification, vector retrieval, SQL generation, tool routing, and Redis-based session context for multi-turn conversations.
- Built a hybrid RAG + Text-to-SQL chatbot using LangGraph to handle FAQs, user-specific queries, and operational workflows.
- Tested and refined English and Arabic query handling for reward points, pickup requests, service coverage, and other backoffice operations.

WORK EXPERIENCE

TDIT Solution Pvt Ltd — Chennai

AI Intern — July 2026 - Sep 2026

- Developed a hybrid AI chatbot using LangGraph, RAG, Text-to-SQL, and tool-based workflows for backoffice operations.
- Implemented intent classification, FAQ retrieval, SQL querying, and session-aware conversation flows using LangChain, Pinecone, Redis, and SQL Server.
- Enhanced chatbot workflows for reward points, pickup requests, service coverage, user data, and multilingual English/Arabic queries.
- Debugged and validated AI workflows to improve intent routing, SQL query accuracy, and conversational reliability.

Infinite Tech AI — Chennai

AI Developer Intern — May 2026 - June 2026

- Built LLM-powered applications using LangChain, LangGraph, and RAG for knowledge retrieval and AI-driven workflows.
- Developed and evaluated machine learning models using PyTorch, including data preprocessing, model training, and performance optimization.

SKILLS

Programming & ML: Python, NumPy, Pandas, scikit-learn, PyTorch
Generative AI: LangChain, LangGraph, RAG, Text-to-SQL, Prompt Engineering
Deep Learning: CNNs, Transfer Learning, Model Pruning
Databases & Retrieval: SQL, SQL Server, Pinecone, FAISS, Redis
Tools & MLOps: Git/GitHub, Docker, Weights & Biases

EDUCATION

St. Xavier's Catholic College of Engineering, Nagercoil, TN

Bachelor of Technology in Artificial Intelligence & Data Science | April 2026

Key Courses: Machine Learning • Deep Learning • Big Data Analytics • NLP • Computer Vision
Certifications: ADPP • IBM AI Engineering • Python for Data Science (Infosys)
